Advanced Retinal Screening

Please read and complete the form below.

At **Eye to Eyecare**, we're committed to providing the most thorough and latest eye care available. We recommend a comprehensive **Advanced Retinal Screening**, which includes high-resolution retinal imaging and **OCT (Optical Coherence Tomography)**, as part of your exam today.

What is the Retina? Think of the retina as the "film" inside a camera – it's the layer at the back of your eye that captures light and sends visual signals to your brain so you can see clearly.

These non-invasive, painless advanced tests allow us to detect early signs of conditions like **macular degeneration, glaucoma, diabetic eye disease**, and other retinal or nerve issues – even in patients without symptoms or vision complaints.

They are valuable for all patients and provide a more complete view of your eye health beyond what a standard exam can show.

Please Select One:

- ☐ Retinal Imaging/Photo only (\$39)
- ☐ OCT Scan only (\$40)
- ☐ Both (\$65 total)
- ☐ I do NOT want either test

Acknowledgment:

By signing below, I understand these tests are optional and not usually covered by some insurance, so I am responsible for the fee(s) listed above.
